## COVID Vaccine (Vax) Injury Database for Ireland

Independent investigators working with Health Freedom Ireland in January and February 2021 uncovered a sudden spike of 1,000 deaths in Irish Nursing Homes<sup>1</sup> using death notice data from <https://rip.ie/>. (Please see the links on the right of this webpage). These deaths occurred immediately after the roll-out of the first COVID-19 vaccinations in those facilities. Please watch this short video which outlines that discovery <https://vimeo.com/636552884>.

Letters with detailed reports were sent to the Government, to TD's, Senators, Media, Gardaí (GNBCI), Coroners and, most importantly, the National Immunisation Advisory Committee (NIAC) and the Health Products Regulatory Authority (HPRA) who are responsible for ensuring that all medicines are safe. We requested a pause of the vaccine rollout until an investigation into the deaths could be carried out to ensure the vaccines were safe. None of the above bodies investigated and we are now seeing a large number of excess deaths at a time when COVID-19 is *not* causing significant deaths. There were 2,500 excess deaths up to October this year despite the alleged protection of COVID vaccines while only 340 excess deaths occurred in 2020; the year the COVID pandemic allegedly, "raged out of control".

We submitted a selection of 50 Adverse Reaction Reports from the 1,000 Nursing Home deaths, complete with corresponding death records, to the HPRA for investigation. In their response to the reports, Anne Tobin of the HPRA replied to us stating:

*“The reports do not meet the criteria for a case safety report, as described in these guidelines, and are considered ‘invalid’, as follows:*

- *Whilst a scheduled date for vaccination was given, it is not known if the persons who passed away were vaccinated.*
- *We note you have described yourself as a concerned citizen as the reporter, and not a healthcare professional, carer or a relative of the persons concerned. As such, under GVP, the reports are based on ‘hearsay’.*
- *The death record did not associate the fatal events with COVID-19 vaccination.”*

We still have no answer to what caused the 1,000 deaths in the nursing homes in January and February, nor any of the additional 1,500 excess deaths that have occurred since then. We are not confident that all Hospitals and GP’s are submitting Adverse Reaction Reports to the HPRA especially when these people were vaccinated shortly before their deaths. Neither are we confident that the reports have all of the necessary detail, or, whether the HPRA is continuing with their irresponsible approach to the disturbing data being sent to them.

We must therefore construct an independent database of adverse reaction reports (deaths) with detailed information which can be analysed publicly online so that the public can make their own judgments about whether the COVID-19 vaccines are safe. We can also ensure that each death is properly reported to the HPRA, and then demand detailed investigations.

**If a relative of yours has died after receiving a COVID-19 vaccine** and you are concerned or suspicious that their death may be related to the vaccine, and/or that it was not properly reported to the HPRA as a possible adverse reaction, please assist us with this important project by providing details of your deceased relative’s medical information (as best you know it) before, during and after the vaccination(s). You do not need permission from other family members and probably should not discuss this with them if you are worried that they may object. We will keep your identity confidential together with any information that might identify your deceased relative, unless you agree to have us submit an adverse reaction report to the HPRA, who in turn must also keep your report confidential.

**If you wish to participate, please provide the following information in an email to [adversereactionreport@gmail.com](mailto:adversereactionreport@gmail.com)<sup>2</sup>**

- **Your name and phone number.**
- **Deceased name and date of death.**
- **Your relationship to the deceased.**

**A Qualified Healthcare Worker (QHW) will contact you to arrange a confidential meeting to take the full report from you in person. Thank you for being part of the solution.**
